

OdourGuard has been developed as a general-purpose 360° protection against odour and unpleasant smells from HVAC filters. This odour-absorbing formula eliminates odours on filters caused by microbial activity, damp, smoke, mould, mildew, cat litter and pets along with noxious smells created by organic acids, and aldehydes as well as other nitrogen and sulphur-based substances like ammonia and hydrogen sulphide.

### Directions For Use

No need to isolate electrics. Use as part of a regular maintenance programme.

**Air conditioner filters** – Turn AC OFF. Spray product directly into the AC air intake and outlet filters, vent and fan system. Wait 5 minutes before switching AC to original settings.

**General surfaces** – Spray and wipe down affected area with a cloth.

**Toilets, showers, restrooms, and sinks** – Spray directly into the drainage receptacle as frequently as required to maintain a fresh environment.

### Disposal

Product: Incineration on land.

Container: Clean with water.

Advanced 

## OdourGuard

EUH210: Safety data sheet available on request.  
P264: Wash hands thoroughly after handling.  
P280: Wear eye protection.

# OdourGuard

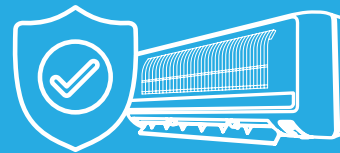

## Odour Eliminator for AC Systems

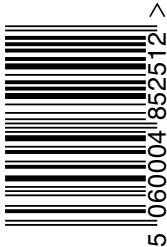

Continuous guard against odour release to ensure 360° protection for filters, AHUs and duct work

Complements anti-viral protectors e.g. Advanced CondensCide and RTU ECD (ISO 18184:2019)

Long-lasting, subtle and naturally clean fragrance
