

Technical data sheet

Jally® Strips

Condensate tray microbial control

Special Features

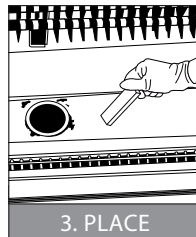

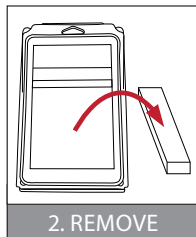

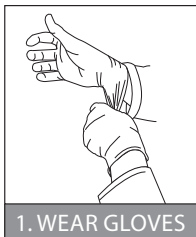

- 12 months protection
- NSF® approved

Jally® Strips are a condensate tray treatment providing up to twelve months protection from slime build up caused by bacteria, fungi, algae and other micro-organisms. Jally® Strips are designed specifically for use on large cooling systems. When used correctly, Jally® Strips are safe to use in food preparation and storage areas. Store upright in a cool, dry place below room temperature.

PRODUCT SPECIFICATION

Name	Jally® Strips
Product Code	S010370GB, S010371GB
Packing Quantity (ml, L)	1 x 50, 1 x 6
Packing Size (L x H x D cm)	45 x 33 x 33.5
Shipping Weight (kg)	1.86, 0.18
Shipping Volume (m³)	0.0523, 0.0005
Soils	Controls bacteria, mould and fungus

Directions of use

Directions for use

Prior to use ensure that the drains are flowing and clear of blockages. Simply place the strip in the tray at the highest end and adjacent to the coil ensuring it's in contact with the water so that the resulting treatment will cover the entire tray. For trays with a central drain hole, place a strip at the highest point on either side of the drain (1 strip per one metre of condensate).

To ensure continued protection against slime and mould buildup, Jally® Strips should be inspected annually - additional strips can be placed in the tray alongside partially used strips. Use Jally® Strips in conjunction with CoolSafe® and DrainSafe® as part of your normal maintenance schedule.

Disposal

Product: Dispose of in a regulated landfill site or other method for hazardous or toxic wastes.

External packaging: Dispose of as normal industrial waste.

Preparation Type: Solid

Biocide: Di-n-decyl dimethylammonium chloride, 10.624 g/100 g, Silver chloride 0.1 g/100 g

Use biocides safely. Always read the label and product information before use.

Not registered for use in the United States of America.
